Australia Awards

Indonesian Language Learning Ambassadors

WHAT IS ILLA?

Following the success of the pilot Indonesian Language Learning Ambassadors (ILLA) program in 2017, Australia Awards Indonesia (AAI) in partnership with Asia Education Foundation (AEF) are pleased to be offering the ILLA program again in Term 3, 2018.

ILLA will connect participating schools with AAI awardees currently studying in leading universities across Australia.

This program will provide AAI awardees with an opportunity to directly engage with Australian schools to learn first-hand about Australian culture, community and classroom teaching practices.

Australian schools engaged in the program will improve students' knowledge and understanding of Indonesia through authentic learning experiences with an Ambassador.

HOW DOES ILLA WORK?

- Australian schools are invited to register their interest in engaging an Ambassador
- AAI awardees apply for the coveted volunteer Ambassador positions
- Selected Ambassadors will be supported by the AEF to prepare for their time in schools
- Australian schools will receive an information pack from the AEF containing all the relevant documentation
- In Term 3, the selected Ambassadors will engage with their matched schools assisting teachers with, but not restricted to, the delivery of Indonesian language and culture classes
- At the conclusion of the program, Australian schools will be asked to submit a brief report outlining the program outcomes.

WHAT ARE THE OUTCOMES?

- Australian schools: ILLA offers a simple and effective way to advance students' Indonesian language skills. In addition, with their comprehensive professional background Ambassadors will add a burst of energy to the classroom providing students with lively anecdotes about life in Indonesia and explain the benefits of being a global citizen.
- Volunteer Ambassadors: ILLA offers an exciting opportunity to gain real-life experience in an Australian classroom and to work alongside an experienced Australian educators. Both the professional and personal experience will provide volunteers with invaluable insight and memories that will last a lifetime and better equip them to make future career decisions.

PROGRAM PARTNERS

Australia Awards: Australia Awards are provided by the Australian Government for tertiary study opportunities at top tier Australian institutions. Funded by the Department of Foreign Affairs and Trade as part of the Australian Government's development cooperation program, they are provided to governments and citizens from selected developing countries, including Indonesia.

In addition to the many Australia Awards awarded annually in the Asia Pacific region, 300 postgraduate scholarships are awarded to Indonesians each year to study at universities across Australia. Scholarships are for postgraduate study only with 85% being offered at the Masters level and 15% at the Doctorate level. More than half of the scholarships recipients are civil servants with the remainder from schools, universities, health, research and civil society organisations. Teachers are well represented among awardees.

Asia Education Foundation: With over 25 years experience, AEF is Australia's premier organisation providing schools with interactive student programs, international school partnerships, teacher professional learning, curriculum resources, research and networks to educate a generation of globally-ready young Australians.

Our programs focus on students, teachers, school leaders and school communities. Our goal is to develop a global mindset and skill set for all young Australians that includes intercultural understanding, language learning and an understanding of Australia's place in the world and the region.
